

Sacci Hook II

Sacci Hook II is an innovative solution for everyone who carries digital equipment at work. With its unique design that is both collapsible and adjustable, there are several steps forward in ergonomics and user-friendliness.

With Sacci Hook II, we want to facilitate and streamline people's work and offer the opportunity to prevent incorrect loading and work injuries. As the weight is distributed over both shoulders, you can reduce the harmful load on other parts of the body.

The product is easily hung over the shoulder, without tensioning straps and it is easy to put on and take off. The stomach plate can be adjusted in height and the size over the shoulder can also be adjusted with a simple adjusting wheel.

MEASUREMENTS (WxHxD): 500x330x160 mm

WEIGHT: 1 120 g

Holders for most tablets are available. Computer or device is easily attached with a RAM ball and RAM joint. For standard equipment and standard versions go to www.sacci.se
